

Data Engineering

SETUP SNOWFLAKE

What is Snowflake?

❄️ Snowflake is a cloud data warehouse that stores mountains of data and still makes finding one row feel like cheating. 🤓

Setup Snowflake Free Trial Account

1. Create Snowflake account (Free Trial One-Month) using this link: [Snowflake Trial](#).

A screenshot of the Snowflake AI Data Cloud sign-up page. The page has a light blue header with the text "Snowflake AI Data Cloud" and "Build enterprise-grade AI and apps on your data in minutes". Below this is a list of bullet points: "Gain immediate access to the AI Data Cloud", "Enable your most critical data workloads", "Scale instantly, elastically, and near-infinately across public clouds", and "Snowflake is HIPAA, PCI DSS, SOC 1 and SOC 2 Type 2 compliant, and FedRAMP Authorized". There are also logos for HIPAA, PCI DSS, SOC 1, and FedRAMP. At the bottom of the list is the text "Start your 30-day trial with \$400 in free credits". On the right side of the page is a sign-up form titled "Create a Snowflake account" with a "1 / 2" indicator. The form includes fields for "First name", "Last name", and "Work email". Below these is a dropdown menu for "Why are you signing up?". At the bottom of the form is a "Continue" button and a "Country" dropdown menu set to "Ethiopia".

Enter your Full name, Last Name, Company Email, Role and hit continue.

Company Email: <Your Gmail account also works>

Company Name: Self Employed

Role: Data Engineer

2. In the same step, we have to choose the cloud provider. Because Snowflake is a cloud data warehouse, we need a cloud service in order to host our Snowflake account, I've selected "Microsoft Azure" with East US 2 (Virginia). That means our Snowflake account will be hosted in Virginia Server but can be accessible anywhere in the world using any browser. (That is the reason it is called cloud data warehouse), check the box and hit "**GET STARTED**".

Start your 30-day free Snowflake trial which includes \$400 worth of free usage

Choose your Snowflake edition*

☐ **Standard**
A strong balance between features, level of support, and cost.

☒ **Enterprise**
Standard plus 90-day [time travel](#), [multi-cluster warehouses](#), and [materialized views](#).

☐ **Business Critical**
Enterprise plus enhanced security, data protection, and database failover/fallback.

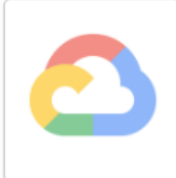

Choose your cloud provider*

Microsoft Azure

Amazon Web Services

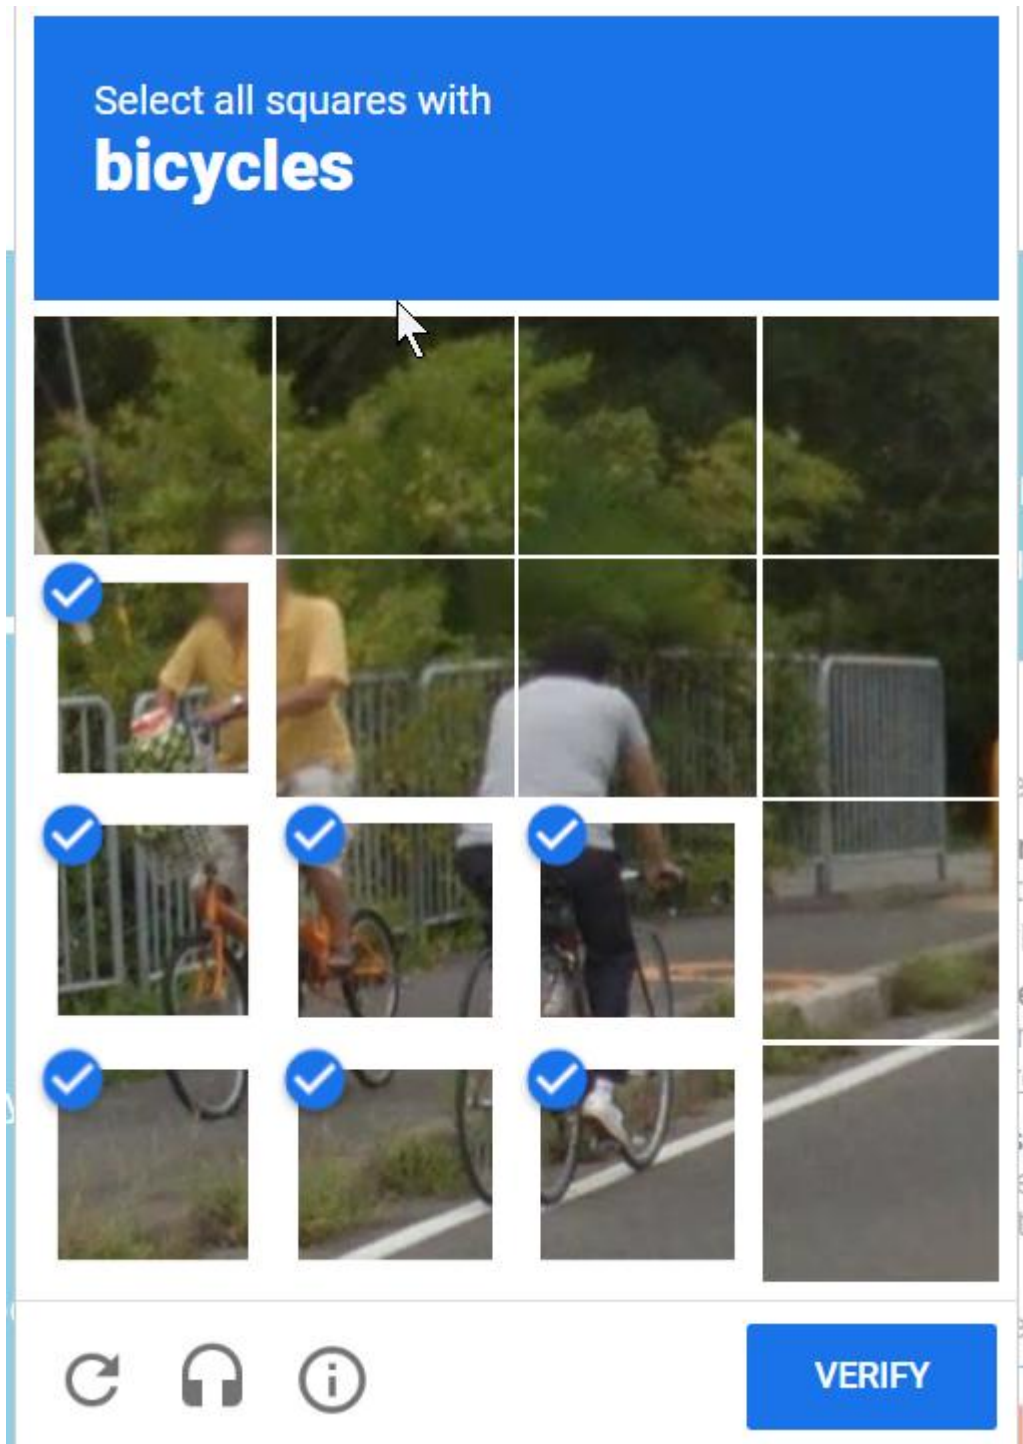

Google Cloud Platform

East US 2 (Virginia) ▼

☒ Check here to indicate that you have read and agree to the terms of the [Snowflake Self Service On Demand Terms](#).

GET STARTED

3. Please select the all the boxes with bicycles (You might get a different one) and hit **VERIFY**.

4. Please select the following option and click Continue.

Thanks for signing up with Snowflake!

Help us better serve you by answering these questions.

Why are you signing up for a trial?

- ☐ Company is considering Snowflake
- ☐ Training or Certification
- ☒ Personal learning and development
- ☐ Other

Skip

Continue

5. Select all and click Continue

Start your 30-day free Snowflake trial which includes \$400 worth of free usage

Thanks for signing up with Snowflake!

Help us better serve you by answering these questions.

What will you use Snowflake for?

- ☒ Use Snowflake as a data warehouse and data lake
- ☒ Run data analysis and build visualizations
- ☒ Load data, build a data pipeline or migrate an existing warehouse
- ☒ Build or train a machine learning model
- ☒ Build or distribute an application with Snowflake
- ☒ List or buy data from the Snowflake marketplace

Skip

Continue

6. Select the language that you prefer to work in, select all if you want as these are just survey questions, this will not affect our Snowflake trial account.

Submit

Congratulations! 🎉👏 you've already started your IT career on the database side by creating the Snowflake account. Please check your Gmail inbox to activate your first Snowflake account. Let's Go.

Start your 30-day free Snowflake trial which includes \$400 worth of free usage

YOU'RE NOW SIGNED UP!

An email to activate your account has been sent to [\[redacted email address\]](#) (it may take a few minutes to arrive).

Thank you for your response!

➤ GETTING STARTED VIDEO

A quick tour of Snowflake's Platform.

[Watch Video](#)

➤ VIRTUAL HANDS-ON LAB

Instructor-led, online lab guiding you through key product features.

[Reserve Your Seat](#)

➤ FULL SNOWFLAKE DOCUMENTATION

A comprehensive document covering all aspects of Snowflake's Platform.

[Go To Documentation](#)

You might see the below in your email. Please save bookmark or save the list as this link is your Snowflake account which can be accessed from any browser. Click on "CLICK TO ACTIVATE" in order to activate your exciting first Snowflake account.

Congratulations on getting started with Snowflake! Click the button below to activate your account.

CLICK TO ACTIVATE

This activation link is temporary and will expire in 72 hours.

Save this for later

Once you activate your account, you can access it at
[https://\[redacted\].snowflakecomputing.com/console/login](https://[redacted].snowflakecomputing.com/console/login).

If you have observed, we did not create username and password for our Snowflake account after clicking the "CLICK TO ACTIVATE" link you will be taken to a page to create your Username and Password. (Please do not share your username and password to anyone)

Welcome to Snowflake!

Santosh Reddy, please choose a username and password to get started

Username

Username can contain only letters and numbers.

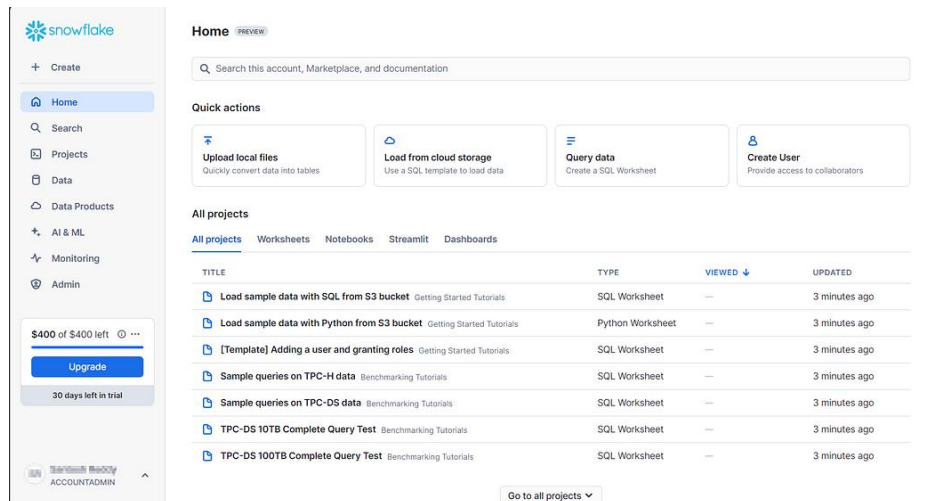

Password

Your password must be 8 - 256 characters and contain at least 1 number(s), 0 special character(s), 1 uppercase and 1 lowercase letter(s).

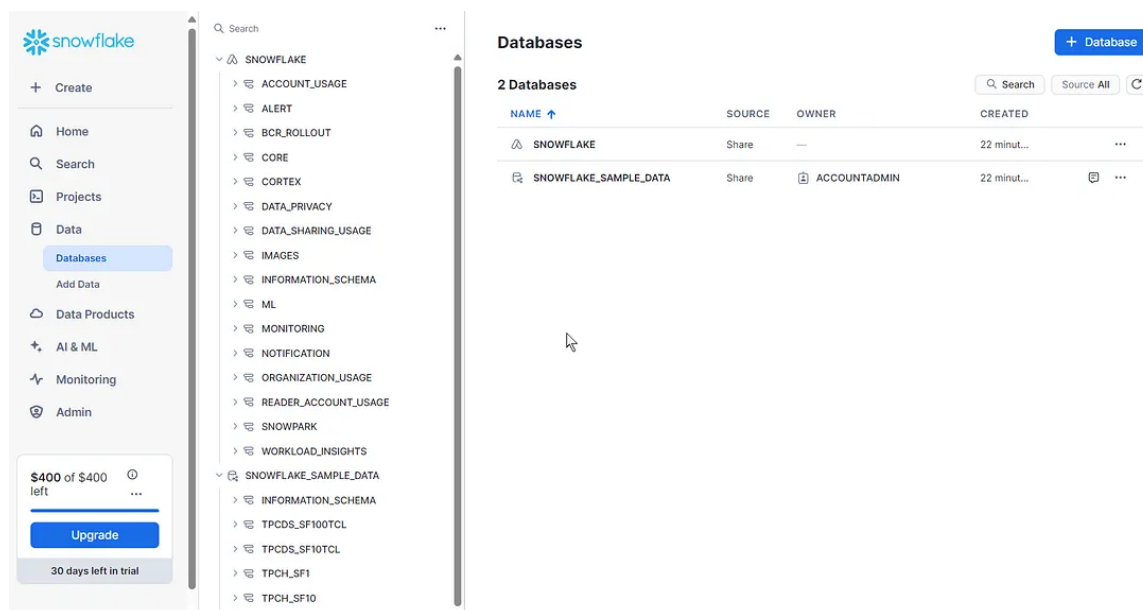

Confirm password

Get started

Congratulations again :), you're inside the Snowflake account now, if you've got a page to set up some data, you can set it up or else please click Skip because in our future blog posts we're going to create our own database with tables and data.

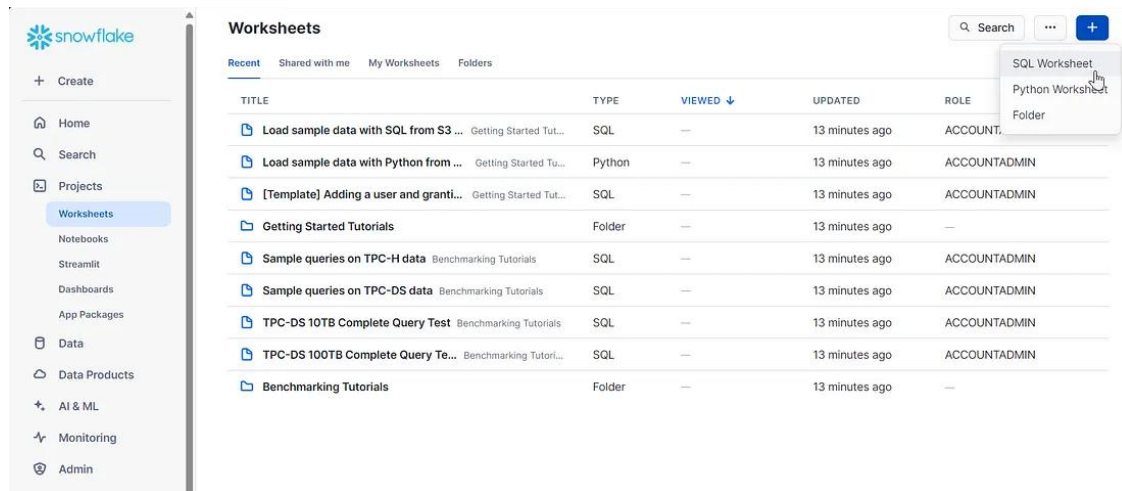

As you can see on the bottom left by default you've logged in using ACCOUNTADMIN role. ACCOUNTADMIN is the highest role which will have access to the entire Snowflake account to create Warehouses, Roles, Databases, Tables, Views etc. and you can also create additional roles using ACCOUNTADMIN role. The trial period comes with \$400 worth of credits. Snowflake account usage is calculated in terms of credits where each credit costs \$1 (not exactly but we do not need to worry about the cost now as we have just started).

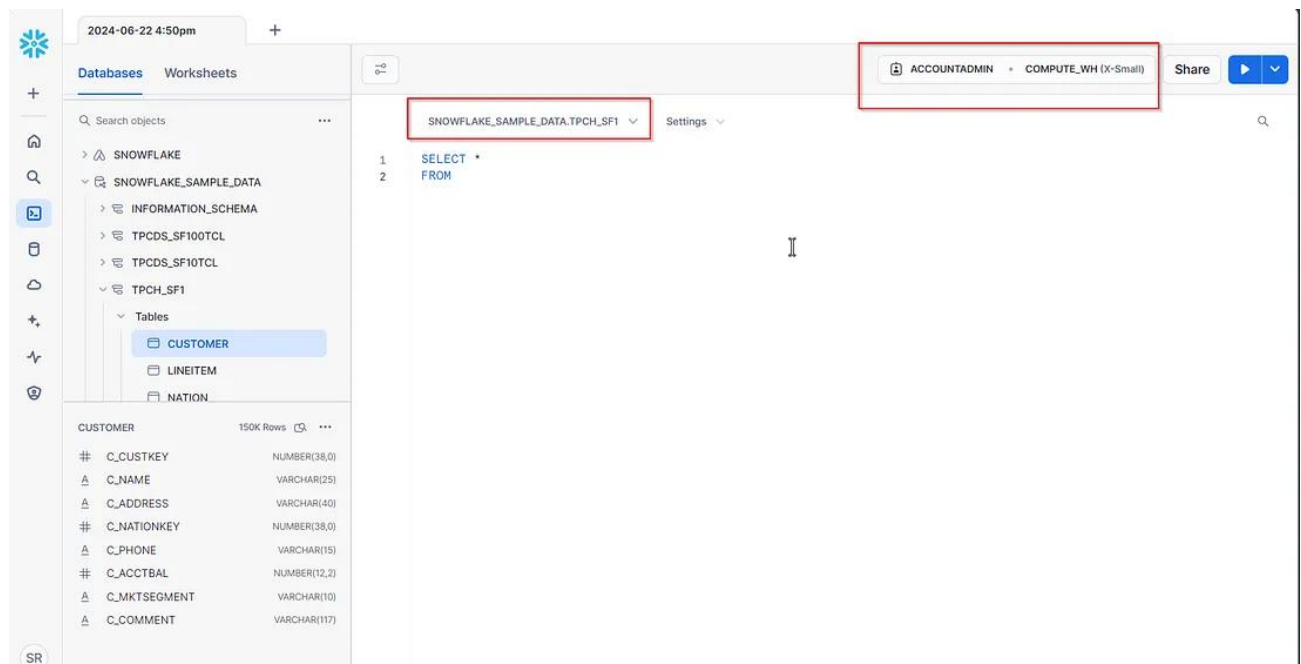

When you click "Data" on the left side, it will show the list of databases created in this Snowflake account. As of now, Snowflake has provided default databases

"SNOWFLAKE" which is the highest database to see the overall account usage and dealing with other tasks, and "SNOWFLAKE_SAMPLE_DATA" this database having different Schemas like "TPCDC_SF100TCL" which contains same tables and data.

To run SQL queries on the sample database tables please click "Projects" on the left side and click plus sign (+) followed by "SQL Worksheet" and below is the result.

Now we've opened a SQL Worksheet, this is also called "**Snowsight**". Snowsight is the SQL editor from Snowflake which is used to perform SQL queries and Python Scripts. As you can see, in order to run SQL queries, the first thing you have to select is the Warehouse on the top right. Snowflake by default has created "COMPUTE_WH(X-Small)" warehouse for us. Warehouse will be differentiated

with the sizes Extra Small(X-Small), Large(L), Extra Large(XL) etc. X-Small is the least performance warehouse offered by Snowflake.
